

Easy Series Intrusion Control Panel

Making security easy

Easy Series from Bosch makes sophisticated security remarkably easy to use — no complicated key commands, no more PINs to remember. Great security has never been this easy and this affordable.

BOSCH
Invented for life

Security comes first

For the best security around, choose Bosch's Easy Series –
it's sophisticated security made easy!

Easy Series –
easy to use, reliable security
that looks great, too!

For your home, you want a security system that's comprehensive yet not complicated, so you're well protected without being inconvenienced. Using this as a premise, Bosch – a world leader in intrusion control systems – designed a security system that makes security easy.

Easy Series from Bosch is an innovative, high-quality security solution for your home. Besides being extremely simple to use, Easy Series offers the power and reliability you need. And it looks great, too!

Simple and clear communication

The biggest challenge with some systems is figuring out what is going on when you only see a few words or some flashing lights. Easy Series takes the mystery out of home security.

The Easy Series security control communicates by speaking to you – and you can choose which language it speaks from 20 different options. This voice reporting capability actually talks you through using your system and tells you status and alarm information. This same information can also be sent to your cell phone as a text message, or the panel can call and talk to you. No more guessing – you'll have the information you need where you need it and in a form that you can understand.

Easy to operate

The colorful, vibrant display on the system's control center also visually communicates with you through easy-to-understand icons. To access your system, you simply pass your proximity token in front of the control station. No PINs. No hassle. From here, Easy Series talks you through managing your security.

Comprehensive home security has never been this easy!

Designed to give you options

The Easy Series Intrusion Control Panel from Bosch features a unique control center that is extremely simple to operate.

Now your security system can work with you, quickly and efficiently.

Choose Quick Arming and you can turn on your system using a single button. With Custom Arming, you determine what parts of your system are turned on so you can open a window for some fresh air, or leave your interior turned off while the exterior is armed in the evening.

The graphic display on the Easy Series control center shows three arming states with understandable, animated icons.

**System is armed
and occupied**

For when your family is sleeping or watching TV in the evening.

**System is unarmed
and ready**

For when you're around the house, coming and going during the day.

**System is armed
and unoccupied**

For when everyone is at work or school or you're away on vacation.

Choose from 20 different languages
for a security solution that's right for you

Once the system is turned on, you can leave your home easily during an arming delay period. You'll know just how long you have thanks to visual indicators on the control center and a tone that gets increasingly louder as the delay period counts down. Convenience is key to living with your security system, and Easy Series delivers.

- Simple and clear communication in the language of your choice
- Intuitive, easy to use control center
- Advanced technology reduces unwanted alarms
- Easy alarm notification by voice or text message
- Listen-in capability

Easy Series sends messages – verbally or via text message to a cell phone – to you and your family, neighbors and friends so you’re in control of your security.

Access your system from anywhere by picking up the phone. One call can arm or disarm your system, or you can listen-in to check on an event or just make sure everything’s OK.

Saving money through Intelligent Threat Assessment

Easy Series employs several features to minimize false alarms that can cost you money and diminish the confidence you have in your security system. With Intelligent Threat Assessment, your system analyzes the input it receives along with other factors to determine the level of threat to your property. If it decides a significant threat exists, then the system generates an alarm.

System information when you need it, where you want it

When an event happens, you need to know about it immediately. In addition to notifying your monitoring service, your system can make a phone call or send a text message to you, a friend, your family, your neighbors or another response service. Other devices such as audible sounders can also be incorporated into your system for comprehensive notification.

Rest assured, you’re secure

Your Easy Series security system is so easy to use and reliable that you’ll have greater peace of mind. Should you ever need help in an emergency, Easy Series lets you signal for assistance with a single button press. Choose Easy Series and see how easy great security can be.

Your proximity token is your key to simple system control

An innovative design for easy operation

Symbols, color, voice and volume –
understandable ways of keeping you informed

The dynamic control center also features a built-in microphone and speaker, which let you verify alarms or communicate with people in your home. At any time you can also call in to your system to listen in on what's going on at your property. Check on children home from school, or notify your spouse about an important change in plans.

It looks great, too!

The attractive Easy Series control center blends in with your décor yet offers a subtle style you're sure to love.

Value and performance you can count on

The Easy Series system is ideal for your home, offering outstanding value and performance for the price. Its flexibility lets you get just the security you need where you need it, and keeps you informed of alarms and status in a way that's remarkably easy to understand.

Grow your security by adding fire detectors and other options for an even more comprehensive solution. Easy Series makes comprehensive, full-featured security for your home easy!

Easy Series system components

Control Center

The control center combines audible and visual information. Using the language of your choice along with animated icons to reinforce the message, you need only to look and listen to obtain system information.

Single-button user interface

Press this one button to access your system. Built-in guidance, prompts and information help you use your security system quickly and easily.

Access to special functions

Special buttons give you easy access to:

- Fire
- Panic
- Medical
- Add/Delete/Change Users
- Chime Mode
- Volume Adjustment

Proximity token

Each member of your household controls the system with a token that is unique to that person. These tokens are the primary means of controlling your system. You can even assign tokens to housekeepers, service personnel and your extended family or neighbors who watch your home while you're away.
